EDUCATION

Ph.D. in Earth System Science , University of California, Irvine	Jun 2026
M.S. in Earth System Science , University of California, Irvine	Dec 2023
B.S. in Earth & Atmospheric Sciences , Cornell University	Dec 2020

EXPERIENCE

Postdoctoral Scholar Aug–Oct 2026
Pritchard & Baldwin Groups, University of California, Irvine Irvine, CA

- Extended PhD research on South Asian monsoon rainfall variability and prepared work for publication

Graduate Student Researcher Sep 2021–Jun 2026
Pritchard & Baldwin Groups, University of California, Irvine Irvine, CA

- Used data-driven and physics-based approaches to identify & explain drivers of South Asian monsoon rainfall variability
- Developed an interpretable machine learning methodology that used neural networks & equation discovery to learn physically meaningful relationships from high-dimensional atmospheric data
- Built open-source Python pipelines on GitHub for cloud data access, large-array processing, uncertainty analysis, model evaluation, & visualization in HPC environments
- Communicated findings through peer-reviewed publications & conference presentations

Consulting Analyst Mar–Aug 2021
Higher Education Research Services, Huron Consulting Group New York, NY

- Built Excel-based financial planning & reporting tools for a research nonprofit
- Developed long-term resource forecasts & presented recommendations to executive stakeholders

Undergraduate Research Assistant Jun–Aug 2020
Commene Group, Lamont-Doherty Earth Observatory Palisades, NY

- Quantified changes in atmospheric methane concentrations during the NYC COVID-19 shutdown
- Applied meteorological analysis & transport modeling to attribute emissions to likely source regions

SKILLS

Python (PyTorch, PySR, Dask, Xarray, Cartopy, Matplotlib) • GitHub • High-Performance Computing
• NetCDF/HDF5/Zarr • Bash • Linux • Microsoft Excel ([Certified Specialist](#)) • $\LaTeX$ • WordPress
